FOR IMMEDIATE RELEASE

December 4, 2023

Public Information Session on Fiber Internet Project December 11 at 6pm

Sebago Fiber will hold an information session on fiber internet for residents & businesses in the towns of Casco, Naples, Raymond, Sebago, and Standish. The session will be held at 6pm on December 11 at the Raymond Broadcast Studio at 423 Webbs Mills Road in Raymond. Online attendance via zoom will also be available. Registration is requested at www.sebagofiber.net/lake.

Sebago Fiber's leadership team will share information on the company's efforts to bring fiber internet to the region, including to areas that currently have no internet connection, and answer questions from the community.

Sebago Fiber is a local internet service provider selected by GPCOG and local communities to bring fiber internet to the area. The company is currently working with towns to collect data on internet demand. The survey data will be used to determine where fiber internet services are provided and when. Streets with the most demand will be built first. The project is planned for construction beginning Spring 2024, with services available as early as this summer for many areas.

Fiber internet is the most reliable, fastest, and future-proof internet service available. Sebago Fiber is committed to providing the best internet service possible, backed by a local support team for an excellent customer experience.

To participate in the demand survey or to register for the information session, please visit www.sebagofiber.net/lake.
